

RAJESH KOKKIRIPATI

Frontend Developer | React.js | TypeScript | 4+ Years of Experience

Hyderabad, India | +91 9885312874 | rajeshkokkiripati047@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of experience building scalable, high-performance React.js applications at Tata Consultancy Services (TCS) for enterprise clients in Financial Services (USAA) and Telecommunications (STC). Proficient in TypeScript, Redux Toolkit, Zustand, Context API, React Router, and REST API integration, with a strong focus on frontend performance optimisation, test-driven development (Jest, RTL, Cypress), WCAG 2.1 accessibility, and clean, maintainable code in Agile/Scrum environments.

CORE COMPETENCIES

- **Frontend:** React.js · JavaScript (ES6+) · TypeScript · HTML5 · CSS3
- **State Mgmt:** Redux Toolkit · Zustand · Context API
- **Routing:** React Router v5/v6 · Protected Routes · Lazy Loading
- **Testing:** Jest · React Testing Library · Cypress (E2E)
- **Styling & UI:** Tailwind CSS · Ant Design · Framer Motion · Responsive Design
- **API & Data:** REST APIs · Node.js (basics) · Axios · Lodash · Async/Await
- **AI Tools:** GitHub Copilot · ChatGPT · Claude — AI-assisted coding, debugging & test generation
- **Tooling:** Git · GitLab CI/CD · ESLint · Prettier · Vite · Webpack · NPM
- **Practices:** WCAG 2.1 Accessibility · Code Reviews · Agile/Scrum · Micro-Frontend

PROFESSIONAL EXPERIENCE

React.js Developer | Tata Consultancy Services (TCS)

Feb 2022 – Present

USAA — United Services Automobile Association · Financial Services

Apr 2025 – Present

- Refactored legacy enterprise React screens into modular, reusable components and developed custom hooks (useEffect, useMemo, useCallback) to encapsulate shared business logic, improving code reuse and reducing overall component complexity.
- Implemented Zustand for lightweight application-level state management in complex UI flows, reducing Redux boilerplate and improving state readability across large feature modules.
- Optimised application performance using code splitting, lazy loading, and memoisation (React.memo, useMemo, useCallback), reducing initial page load time by 20% across key user flows.
- Maintained unit and integration test suite using Jest and React Testing Library (80%+ coverage) and implemented Cypress E2E tests for critical user flows, preventing regressions across 10+ consecutive sprints.
- Built pixel-accurate, fully responsive UIs from Figma designs while enforcing WCAG 2.1 accessibility (a11y) standards across all components.
- Integrated TypeScript across new components and feature modules, improving type safety and reducing runtime errors in production.
- Enforced code quality using ESLint and Prettier, reducing lint errors by 40% and standardising formatting across the team codebase.

- Maintained GitLab CI/CD pipelines, resolving test failures and coverage drops to ensure zero-defect releases each sprint.
- Conducted peer code reviews following structured Git branching strategies, cutting average PR review cycle time by 30%.
- Leveraged AI-assisted coding tools (GitHub Copilot, ChatGPT, Claude) for component development, debugging, and test-case generation, accelerating day-to-day development velocity.

STC — Saudi Telecom Company · Telecommunications

Feb 2022 – Mar 2025

- Developed and maintained high-performance Agent Portal UIs using React.js and JavaScript (ES6+), with Context API for state management and React Router v6 for client-side navigation.
- Integrated RESTful APIs via Axios and leveraged Lodash for efficient data transformation, ensuring seamless frontend–backend communication.
- Built a reusable custom React hook library to encapsulate shared business logic, reducing duplicate code and improving development velocity across the team.
- Boosted application performance by 35% through systematic code splitting, lazy loading, and memoisation — significantly reducing initial bundle size and load times.
- Achieved 80%+ unit test coverage using React Testing Library and Jest, catching defects early and maintaining component reliability across all sprints.
- Collaborated cross-functionally with designers, backend engineers, and product managers in Agile/Scrum ceremonies; conducted code reviews and contributed to improving team delivery speed by 15%.

EDUCATION

Bachelor of Technology (B.Tech) — Electrical & Electronics Engineering **2020**

Sir C. R. Reddy College of Engineering, Eluru
